PLAN 75.24 PUBLIC QUESTIONS AND COMMENTS –

- a. **Smelting Works – Drainage** – Victorian brick built draining works has collapsed. Trying to move the drainage forward, but Shropshire Council are not quite sure on how to determine a change to the changing – from a 9 inch culvert, interrupted by a tree, to 5 x 225mm pipes to take the flow from the hill and from the next property. Shropshire Council planning are not happy with the silt build up – new chambers have been installed. Draining works completed in June 2024, prior to the flooding. Owners have met with engineers, installed underground pipes with a greater swale, but the silt built up and flooded Wynnstay and the company.
- b. **Clifton House** – development to the rear of the property. Development removed topsoil, which has affected beech trees with TPOs. Local tree surgeon attended and report produced and states that it is the dangerous fungus that has caused the problems and the tree will become unsafe within the next 2 years. Prior to the development the orchard was dry, now following rain the site is flooded since the development has been built. Cllr Fletcher reported that he has previously spoken to Mr Preston, advised that this was not a parish council matter and has advised Mr Preston to come to a meeting, and has provided the Shropshire Council Tree Officer email address to follow up with the Tree Officer.

SUPPORT – in our experience through this last winter, following the flooding of storm Ashley, which was contributed to by excess highway water, with the works that have been carried out since, the draining system now works far better than it has done previously, to our local knowledge. Therefore we emphasize the importance of a site visit as soon as possible.
